i Bronze

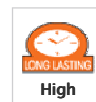

The most innovative tanning technology and exclusive "Melanocyte Energizer"™ Complex guarantee excellent results. Contains prize-winning multiple bronzers with immediate and delayed effects. The enriched silicone emulsion facilitates even application, creating a wonderful sensation of well-being.

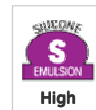

Immediate Bronzers: A super-immediate bronzed colour that lasts 24-48 hours. Wash your hands carefully after use!

Melanocyte Energizer Complex™: The Melanocyte Energizer Complex stimulates the highest levels of natural melanin production and accelerates tanning.

Long Lasting Bronzers: A delayed bronzed colour that can be seen after 8-24 hours and lasts up to 3-7 days. Wash your hands carefully after use!

Silicon Emulsion: Nourishes and softens the skin and eliminates the dehydrating effects of UV light for healthier skin.

Tan Xcel Base Builder
